Reminder for Participants of the Energy Star Efficient Refrigerator Rebate Program

Lihue, Kauai, HI – 07/16/10 - Kaua'i Island Utility Cooperative (KIUC) members who took advantage of the \$250 rebate to replace their existing operational refrigerator with a new Energy Star refrigerator have until July 30 to submit their rebate forms.

Those participating in the program had from May 24, 2010 until June 23, 2010 to purchase a new Energy Star refrigerator from one of the participating appliance dealers: Kapa'a Electric and Appliance, The Home Depot and SEARS.

The participating member needs to submit the program application along with a proof of purchase and proof that the refrigerator has been removed from service to qualify for the rebate. Proof of purchase will consist of a copy of the sales receipt.

Proof of recycling will consist of a receipt from the company that removed the unit from the home (Kaua'i Commercial), or a receipt from Puhi Metals showing that it was delivered to and accepted by them. The address on the recycling receipt must match the address on the program application. Participants must record information about the old refrigerator on the program application.

The program was able to accommodate 360 participants. Landlords were excluded from participating, and there was a limit of one refrigerator rebate per household.
