

#### Aloha!

On November 2, 2002, KIUC first formed as a cooperative. Looking back over the past 20 years, there are so many achievements to celebrate. Looking forward, we continue to strive to be industry leaders as the world adopts new technologies to address new challenges.

Over the past two decades, we've adapted to high fuel prices, protection of endangered species, hydroelectric power and installing advanced metering infrastructure (AMI). We have always managed to pivot and come up with solutions that are now recognized worldwide.

Our achievements include building \$134 million in equity and returning \$39 million to our members over the years.

During 2022, KIUC made the remarkable achievement of leading the State of Hawai'i with the highest percentage of renewables, the best reliability and the lowest residential rates.

Having reached our renewable energy goals nine years ahead of schedule, our Board of Directors updated our Strategic Plan to reach 100% renewable energy by 2033.

As we continue our leadership forward as a cooperative, we sincerely appreciate our members' commitment to KIUC over the years. We would not be able to do any of this without your support.

David J. Bissell

President and Chief Executive Officer

Chairman of the Board

## 2022 KIUC at a Glance

**2022 Peak Demand:** 78.1 MW

259.2 MW

Generation **Capacity:** 

**Number of** 

**Meters: 38,799** 

**Miles of Line:** 

**Transmission: 171** 

**Distribution: 1,359** 

**Megawatt Hours Generated in 2022:** 

527,924

**Total Revenue 2022:** \$174.8 million

Renewable Generation **Capacity:** 142.2 MW

**Oil Fired** Generation **Capacity:** 117 MW

## **Renewable Progress**

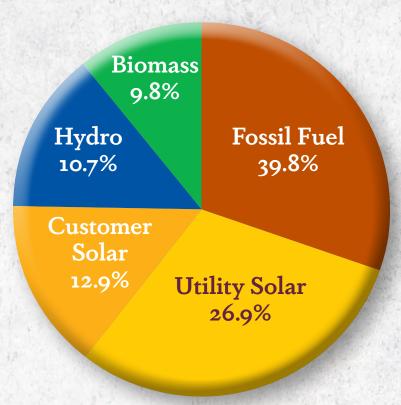

#### **KIUC Leads the State in Renewable Generation**

#### Facts:

- \* KIUC renewable percentage for 2022: 60.2%
- ❖ KIUC's Strategic Plan goal was updated to 100% renewable by 2033
- On sunny days, KIUC routinely reaches 100% renewable generation for five or more hours

### **2022 Fuel Mix by Source**

# How does KIUC calculate its renewable percentage?

Every year, KIUC must report its Renewable Portfolio Standard (RPS) to the Hawai'i Public Utilities Commission. In 2022 the Hawai'i Legislature changed how the RPS is calculated. The RPS calculation previously reflected the renewable percentage of electricity that was sold. Under the new formula, RPS is calculated as a percentage of electricity that was generated. Because of this and other factors, the KIUC's RPS dropped from 2021 to 2022, even though we generated roughly the same amount of renewable power in both years.

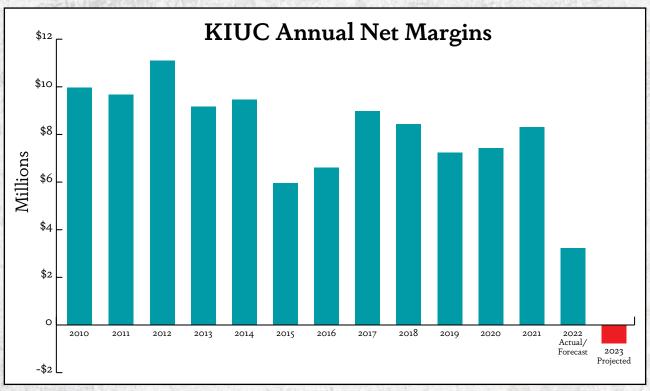

## **2022 Rate Case**

For the second time in its 20-year history, in late 2022 KIUC filed for an increase in rates with the Hawai'i Public Utilities Commission (PUC).

Since the last base rate increase in 2010, the Consumer Price Index (CPI) has risen a cumulative total of around 36% in Hawai'i. While KIUC has managed to keep its controllable costs below the inflation rate, electricity sales haven't kept pace. There's a growing gap between expenses and revenues; sales have increased only 5% since 2010.

Inflation, along with escalating costs associated with endangered species compliance and more than \$80 million invested in necessary improvements to the grid and IT infrastructure, have created pressure on KIUC's balance sheet over time.

As a not-for-profit organization, KIUC must maintain a comfortable net margin, which is the money left over from sales after subtracting expenses. In the past few years margins have decreased to the point that KIUC is in danger of no longer meeting lender requirements, thus creating the need for a rate increase request. For more information on the rate case, visit www.kiuc.coop/ ratecase.

Note that the margins reported in this graph for 2020, 2021 and 2022 include Lost Gross Margins (LGM) KIUC has been allowed to accrue due to a loss in sales from COVID 19.

### **Did You Know?**

Did you know in 2022 KIUC personnel conducted 149 home energy audits to help members reduce their bills? Contact our Energy Services team for tips on how to manage your energy use: energyservices@kiuc.coop

The cooperative begins operations with zero percent equity and the highest electric rates in the state.

Plans are developed to improve reliability and diversify energy resources.

A study to evaluate the feasibility of renewable generation on Kaua'i is completed.

2002

KIUC holds its first Board of Directors election and conducts its first Annual Membership Meeting in 2003.

## Reflecting B 20-Year Co-

The KIUC Board of Directors releases its first Strategic Plan, including a goal to reach 50% renewable generation by 2023.

2007

Kaua'i's first utility-scale solar farm (REC Solar, Kapa'a) begins selling power to KIUC.

on sunny days.

By 2011, KIUC has retired \$25.4 million in patronage capital to members.

## ack On Our op Journey

KIUC is named the "Electric Cooperative of the Year" by the Smart Electric Power Association in 2021.

er Station turbine is enabled to run in denser mode, allowing KIUC to run renewable energy for multiple hours

> The 12-megawatt Koloa and ---Anahola solar projects are built and placed into service.

Global renewable leader AES is selected to develop a second solar+storage project in Lāwa'i; when completed it is the world's largest such facility.

In 2017, the KIUC Board updates its renewable goal to 70% renewable by 2030, and KIUC partners with Tesla to open the world's first utility-scale solar+storage project in Kapaia.

KIUC introduces SmartHub, an online customer information system that enables tracking and management of members' energy use.

2022

As of 2022, KIUC has retired \$39 million in Patronage Capital to its members, and boasts the highest percentage renewables, best reliability and lowest residential rates in the State of Hawai'i.

Installation of advanced metering infrastructure (AMI) is completed.

## Community Support

KIUC returned full-force to community and educational events with partners such as the Kaua'i Community Science Center (KCSC) and AES. We participated in school science fairs, career days, field trips, town festivals, provided speeches and forums for local nonprofit organizations, sponsored and attended fundraisers and continued our Calendar of Student Art Contest.

Kaua'i non-profit organizations were also supported by a variety of KIUC programs:

### **Community Support in 2022**

#### Sharing of Aloha Grants \$24,000

- Alaka'i O Kaua'i Charter School
- Big Brothers Big Sisters of Kaua'i
- Friendship Club
- ❖ Hawai'i Children's Theater
- \* Ke Kula Ni'ihau O Kekaha
- Swim Kaua'i Aquatics

## Community Support and Sponsorships \$124,160

- Kaua'i United Way
- E Ola Mau Na Leo O Kekaha
- The Bridge Kaua'i to College
- Mokihana Club
- YWCA of Kaua'i
- Alzheimer's Association
- Kaulana Kīlauea
- American Red Cross of Hawai'i
- Kōloa Plantation Days

#### KIUC Charitable Foundation \$25,800

- Kaua'i Economic Opportunity
- Catholic Charities of Hawai'i
- Kumu's Cupboard
- University of Hawai'i Foundation
- Kapa'a Middle School Choir Booster Club

### West Kaua'i **Energy Project**

KIUC continued to pursue its most ambitious renewable project to date, the West Kaua'i Energy Project (WKEP). Designed as a hybrid solar and pumped storage hydro facility, WKEP will meet up to 25% of Kaua'i's energy needs,

provide long-duration storage capability, and deliver irrigation water for state-owned agricultural lands. The project is being developed by AES: a global leader in the deployment of large-scale solar and hydro technology.

Government support at all levels is critical to the success of renewable projects. The passage of the Inflation Reduction Act by Congress in August 2022 was critical to the extension of incentive tax credits (ITC), which will keep the cost of electricity as low as possible for KIUC members.

## **Habitat Conservation** Plan

In collaboration with U.S. Fish and Wildlife Service and the State of Hawai'i Department of Land and Natural Resources Division of Forestry and Wildlife, developed a draft Habitat Conservation Plan (HCP) to minimize and mitigate adverse effects on state and federally listed threatened and endangered species

from the continued operation of existing and new KIUC infrastructure. An HCP is required because some KIUC infrastructure necessary to utility operations, including aerial powerlines and streetlights, is known to result in incidental take of certain state and federally listed species, including:

- Three seabird species: Newell's shearwater ('a'o), Hawaiian petrel ('ua'u) and the Band-rumped stormpetrel
- Five waterbird species: Hawaiian goose (nēnē), Hawaiian coot ('alae ke'oke'o), Hawaiian duck (koloa maoli), Hawaiian stilt (ae'o), and the Hawaiian gallinule ('alae 'ula)
- The green sea turtle (honu)

Developing and publishing the HCP for public comment, which occurred in early 2023, is an important step for KIUC to ensure compliance with the National Environmental Policy Act and the Hawai'i Environmental Policy Act.

## 2022

Chair: Allan A. Smith

Vice Chairman: Jan TenBruggencate

#### Loan Review

Chair: Phil Tacbian Members: Janet Kass

### **Summary of Operations** For the period 01/01/2022 - 12/31/2022

Financial Results for 2022 found KIUC kilowatt hour (kWh) sales are getting back to "normal" or pre-pandemic sales levels. KIUC experienced a rebound in kWh sales, but unfortunately, like many businesses, this rebound comes after 2 1/2 years of low sales. KIUC is now faced with additional hurdles as cost pressures on our electrical system continue to grow, as spurred by inflation and supply chain delays. With flat sales and increasing costs since our last rate increase in 2010, KIUC has filed with the Hawai'i Public Utility Commission an application to request a rate increase, which could take effect towards the end of 2023.

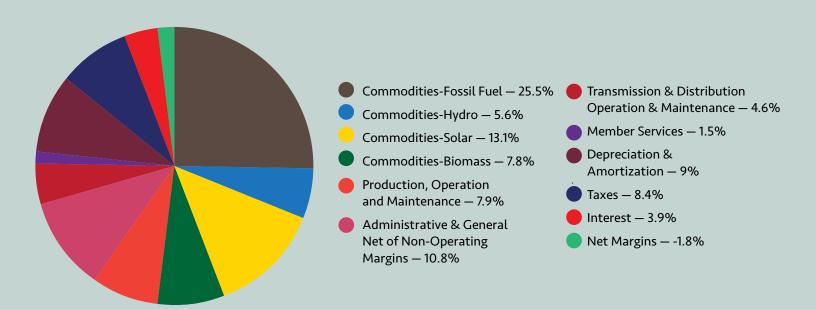

KIUC has continued to provide electric service to all areas of Kaua'i with more renewable generation sources providing more stable prices than any other island in Hawai'i. It has been the mission of the KIUC team to reduce costs in various areas in order to operate efficiently and effectively and continue to maintain a strong financial position. The cooperative's financial team continues to work closely with its lenders and regulators in order to mitigate the financial effects of the coronavirus pandemic and low sales. Revenues, expenses, and net margins totaled \$174.8 million, \$171.6 million, and \$3.2 million respectively, for the period ending December 31, 2022.

The cost of power generation is the largest expense for KIUC, totaling \$104.7 million or 60% of revenues. Commodities, which are fuel and purchased power costs, are the largest component of power generation totaling \$91 million or 52%

of revenues. Currently, fossil fuel is the largest component of commodities totaling \$44.6 million or 25.5% of revenues. Other commodities include hydro power totaling \$9.9 million or 5.6% of revenues, solar power totaling \$22.9 million or 13.1% of revenues, and biomass power totaling \$13.6 million or 7.8% of revenues. The remaining \$13.7 million or 7.9% of revenues represents the cost of operating and maintaining the generating units.

The cost of operating and maintaining the electric lines totaled \$8.1 million or 4.6% of total revenues. The cost of servicing our members totaled \$2.7 million or 1.5% of revenues. The cost of keeping our members informed totaled \$0.9 million or 0.5% of revenues. Administrative and general costs, which include legislative and regulatory expenses, engineering, executive, human resources, safety and facilities, information services, financial and corporate services, and board of director expenses, totaled \$18.9 million or 10.8% of revenues.

Being very capital intensive, depreciation and amortization of the utility plant costs \$15.7 million or 9.0% of revenues. Although not subject to federal income taxes, state and local taxes amounted to \$14.7 million or 8.4% of revenues. Interest on long-term debt, at a very favorable sub-5% interest rate, totals \$6.8 million or 3.9% of revenues. Non-operating net margins added \$0.8 million to overall net margins. Revenues less total expenses equal margins of \$3.2 million or 1.8% of revenues. Margins are allocated to consumer members and paid when appropriate.

Customer Solar	Solar	46.4	5.1
Under Development			
West Kauaʻi Energy Project	Hydro	24.0	22.7

**Total Renewable** Energy in Service 2022 142.2 MW/67%

Potential Renewable Energy in Service 2025 166.2 MW/85%

### Vision, Mission and Culture

Vision - Improve the quality of life for KIUC's members and Kaua'i

Mission - Be an energy solutions leader by:

- ❖ Safely providing reliable power that is fairly and competitively priced
- Encourage conservation and efficient use of energy resources
- Increasing sustainable power supply and environmental stewardship

Culture – The culture is shaped by several elements, all critical to KIUC's success. KIUC embraces the Seven Cooperative Principles and a Hawaiian-based values system, derived from an employee-adopted set of shared values called Hoʻokaʻana Waiwai.

### 7 Cooperative Principles

#### Voluntary and Open Membership

Cooperatives are voluntary organizations, open to all persons able to use their services and willing to accept the responsibilities of membership, without gender, social, racial, political, or religious discrimination.

#### Democratic Member Control

Cooperatives are democratic organizations controlled by their members, who actively participate in setting policies and making decisions. The elected representatives are accountable to the membership.

#### Members' Economic Participation

Members contribute equitably to, and democratically control, the capital of their cooperative. At least part of that capital is usually the common property of the cooperative. Members usually receive limited compensation, if any, on capital subscribed as a condition of membership.

Members allocate surpluses for any or all of the following purposes: developing the cooperative, possibly by setting up reserves, part of which at least would be indivisible; benefiting members in proportion to their transactions with the cooperative; and supporting other activities approved by the membership.

#### Autonomy and Independence

Cooperatives are autonomous, self-help organizations controlled by their members. If they enter into agreements with other organizations, including governments, or raise capital from external sources, they do so on terms that ensure democratic control by their members and maintain their cooperative autonomy.

#### Education, Training and Information

Cooperatives provide education and training for their members, elected representatives, managers, and employees so they can contribute effectively to the development of their cooperatives. They inform the general public, particularly young people and opinion leaders, about the nature and benefits of cooperation.

#### Cooperation Among Cooperatives

Cooperatives serve their members most effectively and strengthen the cooperative movement by working together through local, national, regional, and international structures

#### Concern for Community

While focusing on member needs, cooperatives work for the sustainable development of their communities through policies accepted by their members.
