A Year of ACCOMPLISHMENT

2015 ANNUAL REPORT

Our cooperative made a huge leap forward in 2015, moving much closer to our goal of using renewable resources to supply at least 50 percent of our power generation by 2023.

That is one of the reasons the theme of this report is "A Year of Accomplishment."

In the past five years, we have reduced our fossil fuel consumption by nearly 30 percent. Greenhouse gas emissions are now below our 1990 level.

The plunge in oil prices was an unexpected, but welcome, break. The average residential bill fell 20 percent in 2015. But we did not let up in our pursuit of cleaner alternatives. Now we are in a much stronger position to help insulate Kaua'i from oil price increases.

With the dedication of our Anahola solar project and completion of the Green Energy Team biomass project, renewable energy accounted for 38 percent of our power generation at the end of the year. That is up from 13 percent in 2014.

While our highest profile work was in renewable energy, we did not forget about our everyday interactions with members. KIUC invested in a new customer service system that enables members to track their energy use and account information online, and easily pay bills on the phone or with a mobile device.

There was much discussion about utility ownership models in 2015. People across Hawai'i are becoming educated about the benefits of the cooperative.

A key advantage is our exclusive focus on our members and our community. We do not have to weigh the cost of serving customers against the expectations of shareholders.

Our success is a tribute to the work of our elected board and our 152 employees. We are all member-owners, committed to providing exceptional value and service to our island community.

David J. Bissell

President and Chief Executive Officer

Our community electric cooperative continues to lead the state and the nation in our commitment to renewable energy and our action on that commitment.

Our 2015 opening of the Anahola solar array followed the opening a year earlier of the Köloa solar array. Each, at commissioning, was the largest solar farm in the state. As the year ended, we were near opening the Green Energy biomass project, which would bring our utility to 40 percent renewable.

Looking forward, we are planning the biggest utility-scale solar and storage facility in the nation in cooperation with Solar City and Tesla. We also are in the planning phases of two more major solar and storage projects, plus a West Kaua'i pumped storage facility that will help our community add even more renewable resources to our grid.

All of this should bring us—with years to spare—to our 2023 strategic goal of 50 percent renewable power. It also will push us closer to the state's goal of 100 percent renewable power.

There is so much movement on renewables, and it is happening so much faster than we planned for, that our progress is now far ahead of our strategic plan.

In the coming year, we will update the plan and then work on how to beat it, too.

Jan TenBruggencate Chairman of the Board

From the CEO and Chairman of the Board

2015 KIUC Board of Directors

Chairman: Jan TenBruggencate

Vice Chairman: Calvin K. Murashige

Treasurer: Peter Yukimura

Secretary: Karen Baldwin

Board: Carol Bain, Dennis Esaki, Pat Gegen, David Iha and Teofilo "Phil" Tacbian

The role of the board of directors is to set the policies by which the cooperative operates and to develop long-range goals for the delivery of reliable power that is also safe, economical and environmentally responsible.

The board advocates for the members and makes decisions with the best interests of the membership in mind. Directors are accountable to the membership through annual elections.

The president and CEO is the board's only employee. The board is responsible for evaluating his or her performance. The CEO is accountable for the day-to-day operations of the utility and ensuring the cooperative is professionally managed and responsive to its members.

In Memorium: Carol Bain

Carol Bain, one of the longest-serving members of the KIUC Board of Directors, passed away May 16, 2016.

An advocate for transparency and open communication with members. Carol was first elected to the board in 2007. In March 2016, she was elected to her fourth three-year term. She served as secretary from 2013 to 2014 and most recently was chairwoman of the Policy Committee.

"We honor Carol's memory and her work when we consider how we can be even more open and helpful to members," said Board Chairman Jan TenBruggencate. "It would be difficult to imagine a more dedicated board member than Carol."

The cooperative started 2015 with renewable resources generating 13 percent of its electricity. By the end of the year, with the completion of the Anahola solar array and the Green Energy Team biomass plant, KIUC had boosted that number to 38 percent. KIUC is on track to reach its goal of using renewable resources to generate at least 50 percent of Kaua'i's power by 2023.

Some highlights of 2015:

- February: Green Energy Team biomass plant begins testing. This 7-megawatt plant provides 12 percent of Kaua'i's power. The only project of its kind in this country, the \$90 million plant burns wood chips from invasive species and locally grown trees.
- April: For the eighth year, KIUC is ranked among the nation's Top 10 utilities for the integration of solar by the Solar Electric Power Association.
- May: \$2.1 million in patronage capital is refunded to the members.
- May: An update on the plans for a pumped hydro storage system on the westside is presented at a community meeting in Waimea.
- July: The co-op holds its 13th annual membership meeting; 282 people attend.
- July: The co-op distributes 6,000 LED bulbs in Princeville, Līhu'e and Waimea.
- September: KIUC signs a power purchase agreement with SolarCity for electricity from the first utility-scale solar array and battery storage system designed to supply power to the grid in the evening. The SolarCity project, which will use Tesla Powerpack battery technology, is believed to be the first utility-scale system in the U.S. to provide dispatchable solar energy, meaning the utility can count on electricity being available when it is needed, even hours after sunset.
- September: KIUC sponsors the island's second annual Drive Electric event promoting electric vehicles.
- September: Using smart meter technology, KIUC begins work on a time-of-use pilot program that offers a lower rate on electricity consumed during the day, when solar energy is abundant.
- October: KIUC upgrades its customer information and billing system, giving members more ways to obtain account information and make payments online.
- November: The 59,000-panel Anahola solar array is dedicated. The largest solar project in Hawai'i, this 12-megawatt, \$54 million solar array reduces KIUC's carbon dioxide emissions by 18,000 tons a year.
- December: Green Energy biomass plant comes online.
- December: Cumulative rooftop solar installations by members total 3,390—about 12 percent of all residential customers.
- December: Average residential bill in 2015 is \$163.04—nearly \$40 less than in 2014.

With Anahola solar and the Green Energy plant online, KIUC finishes 2015 with 38 percent of its electricity generated by renewable resources.

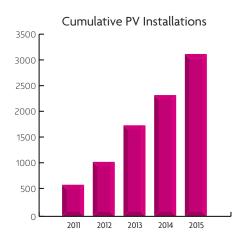

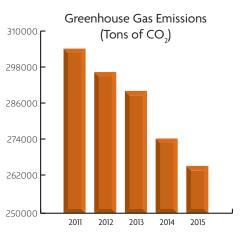

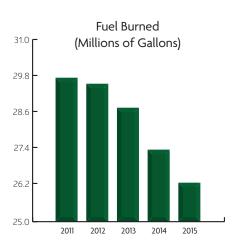

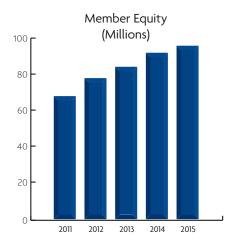

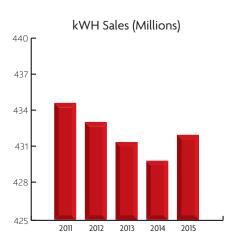

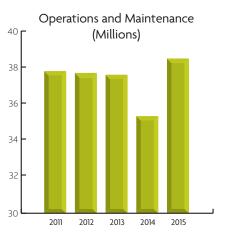

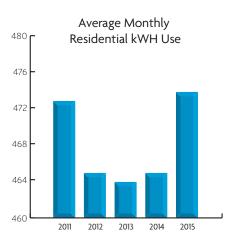

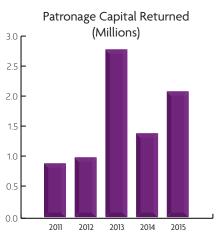

Summary of Operations

For the period 01/01/2015 through 12/31/2015

KIUC results of operations for the year ended December 31, 2015, remained strong despite a significant decrease in revenues from 2014. Revenues decreased 20 percent due to lower fuel and purchased power costs. In 2015, KIUC's members spent \$31.4 million less in fuel and purchased power costs than in 2014. Overall, electricity use on the island was slightly higher than last year. In 2015, KIUC shifted about 23,700 megawatt-hours of generation from fossil fuel to renewable energy. The cooperative is working hard to reduce costs, operate efficiently and effectively, and preserve a strong financial position, while maintaining safety and reliability. Revenues, expenses and net margins totaled \$143.5 million, \$137.5 million and \$6.0 million, respectively, for the 12-month period ending December 31, 2015.

As is the case for all electric utilities, the cost of power generation is the largest expense, totaling \$75.9 million or 52.9 percent of revenues. Commodities—fuel and purchased power costs—are the largest component of power generation, totaling \$61.8 million or 43.1 percent of revenues. Currently, fossil fuel is the largest component of commodities, totaling \$51.0 million or 35.5 percent of revenues. Other commodities include hydropower, \$4.7 million or 3.3 percent of revenues; solar power, \$5.4 million or 3.8 percent of revenues; and biomass, \$0.7 million or 0.5 percent of revenues. The remaining \$14.1 million or 9.8 percent of revenues represents the cost of operating and maintaining the generating units.

Operating and maintaining electric lines totaled \$5.3 million or 3.7 percent

of total revenues.

Servicing our members totaled \$2.9 million or 2.0 percent of revenues. Administrative and general costs—which include legislative and regulatory expenses, engineering, executive, human resources, communications, safety and facilities, information services, financial and corporate services, and board of director expenses—totaled \$16.7 million or 11.7 percent of revenues.

Being capital intensive, depreciation and amortization of the utility plant costs \$17.0 million or 11.9 percent of revenues. Although not subject to federal income taxes, state and local taxes amounted to \$12.1 million or 8.4 percent of revenues. Interest on long-term debt, at a favorable sub-5 percent interest rate, totals \$7.5 million or 5.2 percent of revenues. Nonoperating net margins deducted \$0.1 million from overall net margins. Revenues less total expenses equal margins of \$6.0 million or 4.1 percent of total revenue. Margins are allocated to consumer-members and paid when appropriate.

The direct and indirect financial benefit to KIUC members is significant. Since 2002, KIUC has returned \$32.6 million to members in the form of patronage capital retirements and billing credits. Also, KIUC contributed \$115,741 to local nonprofits and community organizations in 2015.

In addition, the indirect financial benefits (that is, ownership) include patronage capital that is held by KIUC on behalf of its members to potentially be distributed at future dates, as determined by the KIUC Board of Directors. As of December 31, 2015, this amounts to \$96.4 million.
